## Convey AClick Student Response Hardware

Ergonomically designed hard plastic casing with finger grips, clear LCD screen and soft buttons make the Convey remote durable and easy to use

## Convey Student Response Software

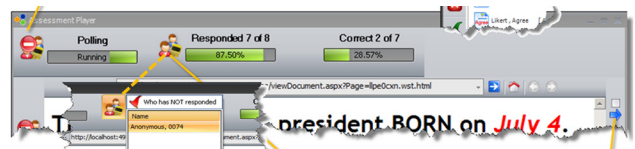

The Convey AClick Student Response system is fully integrated with Convey Audio-Visual Control and can be run with any AV device including teacher remote, PC, Slate or tablet monitor.

### Formative and summative assessments

Create curriculum in formative or summative assessment mode. The Convey interactive response system helps educators prepare clear, measurable material.

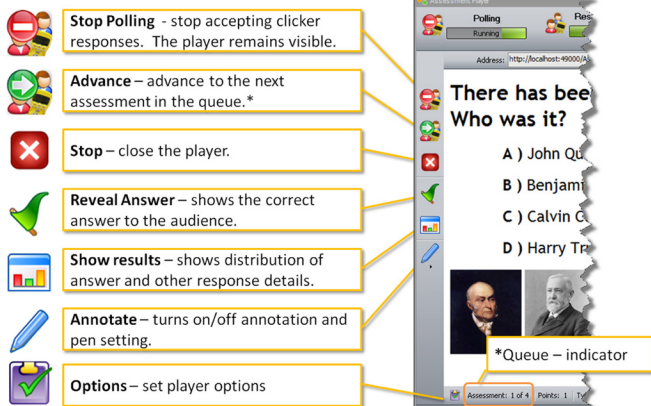

### Instant feedback

Students see immediately how they did on each question. Convey Student Response polls student answers and displays results on screen if the educator chooses. Knowing how the class is doing enables teachers to review material if necessary.

## Convey AClick Student Response Interface

Icons create simple user interaction

### Ad hoc capability

Educators can pull resource material from any source using their computer, document camera, the internet or prepared assessments. This "ad hoc" capability enables educators to take advantage of "teaching moments" in the classroom.

### Reporting, grading and record keeping

Educators can download lesson results into Microsoft Excel for classroom monitoring. Convey Student Response also delivers reports to administration for tracking at the classroom, school or district level.

### Self-paced Instruction

Convey enables self-paced instruction using paper printouts so students can engage lessons in their own learning style and at their own rate.
